ABSTRACT:

A method and apparatus are disclosed for providing persistent storage of Web resources. Uniform Resource Locators ("URLs") that identify Web resources are augmented to include a time stamp. A web browser and a web server are disclosed that accommodate a time stamp parameter and allow a user to refer to any Web address with a precise target date. The disclosed Web browser can optionally include a mechanism to facilitate the specification of the desired date and time, or the user can manually append the time stamp to the URL indicated in the "Location" window of the browser. The persistent Web servers (i) receive URLs containing a time stamp or relative time-stamp, (ii) extract the time stamp, (iii) retrieve the appropriate Web page corresponding to the time-stamp, and (iv) return the appropriate page to the client. The persistent Web servers include a persistent archive for storing all of the versions of Web resources that will be persistently available to Web users.

CROSS REFERENCE TO RELATED APPLICATIONS

[0001] This application is a continuation of pending application Ser. No. 09/201,750, filed Dec. 1, 1998. The present invention is related to U.S. patent application Ser. No. 09/201,752, entitled "A Method And Apparatus For Persistent Storage Of Web Resources," U.S. patent application Ser. No. 09/201,751, entitled "A Method And Apparatus For Persistent Access To Web Resources," and U.S. patent

application Ser. No.09/201,749, entitled "A Method And Apparatus For Resolving Domain Names of Persistent Web Resources," each filed contemporaneously herewith, assigned to the assignee of the present invention and incorporated by reference herein.
